Professional Summary

Professional Summary

- Detail-oriented professional with a strong foundation in operational management, project coordination, and client communication.
 - Eager to leverage my background to support tech development and business growth objectives
 - Proven ability to handle direct logistics, strategic marketing pitches, and complex, cross-functional projects.
-

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, Node.js, Python, Java.
 - **Frontend:** React Native, Next.js, Expo, [React.js](#), [Three.js](#), HTML5, CSS3.
 - **Backend:** Node.js, Flask, RESTful API Design, PostgreSQL/NoSQL database management.
 - **Tools & Environment:** VS Code, Antigravity IDE, Kimi Code, Git, Ngrok, Docker.
 - **Infrastructure:** Solar energy system integration, hardware performance optimization, technical support, administrative experience, customer service.
-

Professional Experience

Lead Full-Stack Developer | Independent Projects

Fully Completed Projects

- **SwiftTask:** Architected a dual-service marketplace and delivery platform featuring real-time tracking, geo-optimized matching, and secure payment systems.

- **Manasara:** Developed a comprehensive real- estate management application incorporating land banking, hotel reservations, and property listing modules.
- **Project Management:** Managed a development structure consisting of two separate frontends connected to a single, unified backend.

Finalized Projects I have lead

Operations Manager | Independent Transportation Fleet

- Managed end-to-end logistics and daily operations for a transportation service.
- Directly dispatched and coordinated drivers to ensure efficient routing and consistent service delivery.
- Developed strong operational expertise and leadership abilities through hands-on troubleshooting and dynamic fleet management.

Lead Developer & Client Coordinator | Manasara (Client: Brit Properties)

- Collaborated directly with corporate clients to architect and deploy a real estate platform.
- Honed customer relationship and communication skills by aligning project deliverables with the client's marketing and business strategies.

Head of IT Operations | Brit Properties

October 2025 - February 2026

- Led PropTech integration strategies to streamline real estate operations.
- Managed organizational IT infrastructure, ensuring high uptime and data security for property management systems.

Technical Support & Assistant | Margaret Ekpo International Airport

January 2021 - December 2021

- Provided critical technical support for airport infrastructure and software systems.
- Maintained hardware and network reliability in a fast-paced, high-security international transit hub.

Selected Projects

Project Volt

- Designed a business proposal for solar-powered community charging hubs.

- Calculated precise wattage requirements and inverter efficiencies to provide optimized workstations for remote workers and students.
-

Core Philosophies

- **Quality over Speed:** Committed to well-thought-through architectural decisions rather than rushed implementations.
 - **Functional Integrity:** Prioritizes rigorous testing to ensure that new feature deployments do not break existing system functionality.
 - **Data Safety:** Strict adherence to database protocols, ensuring no destructive changes (dropping tables/columns) occur without thorough review.
-

Education & Certifications

- **Mechanical Engineering Graduate** from University of Nigeria, Nsukka
- **Full-Stack Software Engineering** (Professional Experience Equivalent)
- **Advanced Hardware/Software Integration** (Self-Directed)
- **Customer service and support** (YouTube)
